USER AND SAFETY GUIDE

3-circuit DIN-mountable Z-Wave® smart switch with potential-free contacts

READ BEFORE USE

This document contains important technical and safety information about the Device, its safe use and installation.

CAUTION! Before beginning the installation, please read carefully and entirely this guide and any other documents accompanying the Device. Failure to follow the installation procedures could lead to malfunction, danger to your health and life, violation of law or refusal of legal and/or commercial guarantee (if any). Shelly Europe Ltd. is not responsible for any loss or damage in case of incorrect installation or improper operation of this device due to failure of following the user and safety instructions in this guide.

TERMINOLOGY

Gateway – A Z-Wave® gateway, also referred to as a Z-Wave® controller, Z-Wave® main controller, Z-Wave® primary controller, or Z-Wave® hub, etc., is a device that serves as a central hub for a Z-Wave® smart home network. The term "gateway" is used in this document.

S button - The Z-Wave® Service button, which is located on Z-Wave® devices and is used for various functions such as inclusion (adding), exclusion (removing), and resetting the device to its factory default settings. The term "S button" is used in this document.

Device – In this document, the term "Device" is used to refer to the Shelly Qubino device that is a subject of this guide.

ABOUT SHELLY QUBINO

Shelly Qubino is a line of innovative microprocessor-managed devices, which allow remote control of electric circuits with a smartphone, tablet, PC, or home automation system. They work on Z-Wave® wireless communication protocol, as a gateway, which is required for the configuration of devices. When the gateway is connected to the Internet, you can control Shelly Qubino devices remotely from anywhere. Shelly Qubino devices can be operated in any Z-Wave® network with other Z-Wave® certified devices from other manufacturers. All mains operated nodes within the network will act as repeaters regardless of vendor to increase reliability of the network. Devices are designed to work with older generations of Z-Wave® devices and gateways.

WAVE PRO SERIES

Wave Pro series is a line of devices suitable for homes, offices, retail stores, manufacturing facilities, and other buildings. Pro devices are DIN-mountable inside the breaker box, and highly suitable for new building construction. All Wave Pro devices can be controlled and monitored through the Z-Wave® network.

ABOUT THE DEVICE

The Device is a DIN rail mountable 3-channel smart switch with potential-free contacts. It controls the on/off function for three independent electrical devices with a load up to 16 A per channel. It is compatible with switches (default) and push-buttons.

INSTALLATION INSTRUCTIONS

The Device can be DIN-mounted inside the breaker box.

For the installation instructions, refer to the wiring scheme (Fig. 1) in this user guide.

CAUTION! Danger of electrocution. Mounting/installation of the Device to the power grid has to be performed with caution, by a qualified electrician.

WARNING! Danger of electrocution. Every change in the connections has to be done after ensuring there is no voltage present at the Device terminals.

CAUTION! Use the Device only with a power grid and appliances that comply with all applicable regulations. A short circuit in the power grid or any appliance connected to the Device may damage it.

CAUTION! Do not connect the Device to appliances exceeding the given max. load!

CAUTION! Allow at least 10 mm of space around each Pro device if you expect currents higher than 5 A per channel.

CAUTION! Connect the Device only in the way shown in these instructions. Any other method could cause damage and/or injury.

CAUTION! Do not install the Device where it can get wet.

CAUTION! Do not use the Device if it has been damaged!

CAUTION! Do not attempt to service or repair the Device yourself!

CAUTION! Before starting the mounting/installation of the Device, check that the breakers are turned off and there is no voltage on their terminals. This can be done with a mains voltage tester or multimeter. When you are sure that there is no voltage, you can proceed to connecting the wires.

CAUTION! Do not shorten the antenna.

RECOMMENDATION: Place the antenna as far away as possible from metal elements as they can cause signal interference.

RECOMMENDATION: Connect the Device using solid single-core cables with increased insulation heat resistance, not less than PVC T105°C (221°F).

RECOMMENDATION: For inductive appliances that cause voltage spikes during switching on/off, such as electrical motors, fans, vacuum cleaners and similar ones, RC snubber (0.1 µF / 100 Ω / 1/2 W / 600 V AC) should be connected parallel to the appliance.

CAUTION! Do not allow children to play with the push-buttons/switches connected to the Device. Keep the devices for remote control of Shelly Qubino (mobile phones, tablets, PCs) away from children.

EXTENDED USER GUIDE

For more detailed installation instructions, use cases, and comprehensive guidance on adding/removing the Device to/from a Z-Wave® network, factory reset, LED signalization, Z-Wave® command classes, parameters, and much more, refer to the extended user guide at:

AVISO IMPORTANTE

La comunicazione wireless Z-Wave® potrebbe non essere sempre affidabile al 100%. Questo Dispositivo non deve essere utilizzato in situazioni in cui la vita e/o gli oggetti di valore dipendono esclusivamente dal suo funzionamento. Se il Dispositivo non viene riconosciuto dal gateway o viene installato in modo errato, potrebbe essere necessario modificare manualmente il tipo di dispositivo e assicurarsi che il gateway supporti i dispositivi multicanale Z-Wave Plus®.

MANUAL DE USO Y SEGURIDAD

Interruptor inteligente Z-Wave® montable en DIN de 3 circuitos con contactos libres de potencial

LEA ANTES DE UTILIZAR

Este documento contiene información técnica y de seguridad importante sobre el Dispositivo, su uso y su instalación segura.

¡ATENCIÓN! Antes de utilizar el Dispositivo, lea atentamente y por completo esta guía y cualquier otro documento que acompaña al Dispositivo. El incumplimiento de los procedimientos de instalación podría provocar un mal funcionamiento, peligro para su salud y su vida, violación de la ley o denegación de la garantía legal y/o comercial (si la hubiera). Shelly Europe Ltd. no se responsabiliza de ninguna pérdida o daño en caso de instalación incorrecta o funcionamiento inadecuado de este dispositivo pro no haber seguido las instrucciones de uso y seguridad de esta guía.

TERMINOLOGÍA

Gateway – Un gateway Z-Wave® controlador domótico Z-Wave® también denominado controlador Z-Wave®, controlador principal Z-Wave® o hub Z-Wave® etc. es el dispositivo que sirve de centro de control para una red de hogar inteligente Z-Wave®. Se utilizará el término "gateway" en este documento.

Botón S – El botón de servicio Z-Wave®, que se encuentra en los dispositivos Z-Wave®, se utiliza para diversas funciones como la inclusión (afadir), exclusión (eliminar) y el restablecimiento del dispositivo a su configuración predeterminada de fábrica. El término "Botón S" se utiliza en este documento.

Dispositivo - en este documento, el término "Dispositivo" hace referencia al dispositivo Shelly Qubino sobre el que trata este manual.

Sobre Shelly Qubino

Shelly Qubino es una línea de dispositivos controlados por microprocesador, que permiten el control remoto de circuitos eléctricos desde un dispositivo móvil, tablet, ordenador o sistema domótico. Funcionan bajo el protocolo de comunicación inalámbrica Z-Wave® a través de un gateway, necesaria para la configuración de los dispositivos. Cuando el gateway esté conectado a Internet puedes controlar los dispositivos Shelly Qubino de forma remota desde cualquier parte. Los dispositivos Shelly Qubino pueden ser utilizados en cualquier red Z-Wave® con otros dispositivos certificados Z-Wave® de otros fabricantes. Todos los nodos que estén operativos en la red funcionarán como repetidores sin importar su fabricante para mejorar la fiabilidad de la red. Los dispositivos están diseñados para funcionar con generaciones antiguas de dispositivos Z-Wave® y gateways.

SERIE WAVE PRO

La serie Wave Pro es una gama de dispositivos adecuados para hogares, oficinas, tiendas minoristas, instalaciones de fabricación y otros edificios. Los dispositivos Wave Pro pueden montarse en DIN dentro de la caja de interruptores y son ideales para la construcción de nuevos edificios. Tuti los dispositivos Wave Pro possono essere controllati e monitorati attraverso la rete Z-Wave®.

Sobre el Dispositivo

El Dispositivo es un interruptor inteligente de 3 canales montable en carril DIN con contactos libres de potencial. Controla la función de encendido/apagado de tres dispositivos eléctricos independientes con una carga de hasta 16 A por canal. Es compatible con interruptores (por defecto) y pulsadores.

INSTRUCCIONES DE INSTALACIÓN

El Dispositivo puede montarse en DIN dentro de la caja de interruptores.

Para las instrucciones de instalación, consulte los esquemas de cableado (Imagen 1) de esta guía del usuario.

¡ATENCIÓN! Peligro de descarga eléctrica. El montaje/installación del Dispositivo a la red eléctrica debe ser realizado con cuidado, por un electricista cualificado.

¡ATENCIÓN! Peligro de descarga eléctrica. Cualquier modificación de las conexiones debe realizarse después de asegurarse de que no hay tensión en los terminales del Dispositivo.

¡ATENCIÓN! Utilice el Dispositivo sólo con una fuente de alimentación y un equipo que cumplan con todas las normas aplicables. Un cortocircuito en la red eléctrica o en cualquier aparato conectado al Dispositivo puede dañarlo.

¡ATENCIÓN! No conecte el aparato a Dispositivos que superen la carga máxima indicada.

¡ATENCIÓN! Deje al menos 10 mm de espacio alrededor de cada dispositivo Pro si espera corrientes superiores a 5 A por canal.

¡ATENCIÓN! Conecte el Dispositivo sólo de la manera indicada en estas instrucciones. Cualquier otro método puede causar daños y/o lesiones.

¡ATENCIÓN! No instale el Dispositivo en un lugar donde pueda mojarse.

¡ATENCIÓN! No utilice el Dispositivo si está dañado.

¡ATENCIÓN! No intente manipular o reparar el Dispositivo usted mismo.

¡ATENCIÓN! Antes de iniciar la instalación/montaje del Dispositivo, compruebe que los disyuntores están desconectados y que no haya tensión en sus bornes. Esto puede hacerse con un medidor de fase o un multímetro. Cuando esté seguro de que no haya tensión, puede proceder a conectar los cables.

¡ATENCIÓN! No cortar la antena.

¡RECOMENDACIÓN! Ubicar la antena tan lejos como sea posible de elementos metálicos que puedan causar interferencias en la señal.

¡RECOMENDACIÓN! Conecte el Dispositivo con cables monocristalinos sólidos con una resistencia térmica de

RECOMENDACIÓN: En el caso de los aparatos inductivos que provocan picos de tensión durante el encendido y el apagado, como los motores eléctricos, los ventiladores, las aspiradoras y otros similares, debe conectarse un amortiguador RC (0.1 μF / 100 Ω / 1/2 W / 600 V CA) en paralelo al aparato.

¡ATENCIÓN! No permita que los niños jueguen con los botones/interruptores conectados al Dispositivo. Mantenga los dispositivos que permiten el control remoto de Shelly Qubino (teléfonos móviles, tabletas, ordenadores) fuera del alcance de los niños.

GUÍA DE USUARIO EXTENDIDA

Para obtener instrucciones de instalación más detalladas, casos de uso y una guía completa sobre cómo añadir/eliminar el Dispositivo a/de una red Z-Wave®, restablecer valores de fábrica, señalización LED, clases de comandos Z-Wave®, parámetros y mucho más, consulte la Guía de usuario extendida disponible en:

TERMINOLOGIE

Passerelle : une passerelle Z-Wave®, également appelée contrôleur Z-Wave®, contrôleur principal Z-Wave®, contrôleur primaire Z-Wave® o hub Z-Wave®, etc. est un dispositif qui sera de point central para un réseau domestique Z-Wave®. Le terme "passerelle" est utilisé dans ce document.

Botón S : le bouton de servicio Z-Wave®, que se trouve sur los dispositifs Z-Wave® y que est utilisé pour diverses fonctions telles que l'intégration (ajout), la suppression (retrait) et la réinitialisation du dispositif aux paramètres d'usine par défaut. Le terme "bouton S" est utilisé dans ce document.

Dispositif : dans ce document, le terme "Dispositif" désigne le produit Shelly Qubino qui fait l'objet de ce guide.

A PROPOS DE SHELLY QUBINO

Shelly Qubino es una gama de dispositivos innovadores gérés por microprocesador, que permiten de controlar a distancia los circuitos eléctricos a través de un teléfono móvil, una tableta, un PC o un sistema domótico. Los funcionan sobre el protocolo de comunicación sans fil Z-Wave® a la red de una passerelle, que es necesaria para una configuración de los dispositivos. Lorsque la passerelle est connectée à Internet, vous pouvez controler los dispositifs Shelly Qubino a distance, d'où que vous soyez. Los dispositivos Shelly Qubino peuvent fonctionner en importe quel réseau Z-Wave® avec d'autres dispositifs certifiés Z-Wave® provenant de autres fabricants. Tous les nœuds del réseau alimentados por el sector servirán de répéteurs, quel que soit el proveedor, afin de acceder la fiabilidad del red. Los dispositivos son concebidos para funcionar con las antiguas generaciones de dispositivos y de passerelles Z-Wave®.

SÉRIE WAVE PRO

La serie Wave Pro es una gama de dispositivos adaptados a casas, oficinas, tiendas minoristas, instalaciones de fabricación y otros edificios. Los dispositivos Wave Pro pueden ser montados en DIN dentro del interior del boîtier de los dispositifs Wave Pro y conviennent parfaitement à la construction de nouveaux bâtiments. Tutti i dispositivi Wave Pro possono essere controllati e monitorati a través de la red Z-Wave®.

A PROPOS DU DISPOSITIF

Le Dispositif es un interruptor inteligente montable en DIN con contactos libres de potencial. Es compatible con la función marcha/paro de tres dispositivos eléctricos independientes con una carga de hasta 16 A por canal. Es compatible con los interruptores (por defecto) y los pulsadores.
